The following action is in response to the amendment received April 22, 2005.

Allowable Subject Matter

Claims 1-4, 7-9, 11, 12, 15, and 16 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show or render obvious a torque transmission apparatus as defined in claim 1 including electromagnetic means for bringing a drive shaft into and out of engagement with the first coupling member and comprising a coil arranged around the drive shaft, and wherein the first coupling member is provided with a permanent magnet; whereby, upon application of a current to the coil, the drive shaft is moved into or out of magnetic engagement with the first coupling member.

The art of record also fails to show or teach a torque transmission apparatus as defined in claim 11, wherein a plate is provided at the end of the input drive shaft for engagement with the first coupling member, wherein the input drive shaft and the first coupling member engage magnetically, and wherein in engagement the plate provided at the end of the input drive shaft engages a securing plate provided between the input drive shaft and the first coupling member, the securing plate being of a magnetically permeable material and the permanent magnet means being located behind the securing plate.

The amendments to the claims overcome the previous rejections based on 35 USC 102(b) and 35 USC 103(a). The rejections are withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Receipt is acknowledged of the Information Disclosure Statement filed March 9, 2005. The cited documents have been considered.
